

Grading Checklist - PSP 1

Student Karla Sofia Castro Pérez
 Instructor Adolfo Centeno

Program Int. Ing. Soft.

Legend
1 - O.K.
0 - resubmit

	Grading	Data Entry
Date	21 nov 2025	
Start	20:0	
End	23 / 13:00	
Interrupt	7:00 hr	
Total	19 hrs	

Assignment Package	Comments
☒ PSP1 Project Planning Summary	
☒ Test Report	
☒ PIP Form	
☒ Size Estimating Template	
☒ PROBE Worksheet	
☐ Time Recording Log	
☐ Defect Recording Log	
☐ Source Program Listing	
☒ Test Results	

Program and Test Results	Comments
☒ The program appears to be workable.	
☒ All required tests have been run.	
☒ The actual output is correct for each test.	
☒ Source is compatible with coding standard.	

Test Report Template	Comments
☒ Planned and actual results are included for all tests.	
☒ All information to repeat the tests is provided.	

Time Log	Comments
☐ Time data are entered for all process steps.	
☐ Process steps are sequenced appropriately.	
☐ Time data are entered against the appropriate process step.	
☒ Interrupt time is tracked appropriately.	
☒ Time data are complete and reasonable.	
☒ Times were recorded as the work was done.	

Defect Log	Comments
☐ Every defect has all required data.	
☐ Defects were injected before removed.	
☒ Every defect has a fix time.	
☐ Defects injected in compile and test have fix numbers.	
☐ Defects are adequately described.	
☐ Defect types are consistent with description.	
☐ Defect types are consistent with phase injected.	
☐ Defect types are assigned consistently.	

Grading Checklist - PSP 1

Size Estimating Template & PROBE Worksheet	Comments
☒ <i>Plan and actual size data are complete and reasonable.</i>	
☒ <i>The reuse and base measures are used correctly.</i>	
☒ <i>A suitable number of new parts are identified.</i>	
☒ <i>The item sizes are balanced around medium.</i>	
☒ <i>The relative size data values are correct and based on historical data</i>	
☒ <i>The appropriate PROBE method has been selected.</i>	

PIP Form	Comments
☒ The PIP form is completed.	
☒ The entries show insight and thought.	

Planning Summary	Comments
☐ Planned total time has been entered correctly.	
☐ Planned and actual size data are entered correctly.	
☐ <i>Planned and actual size/hour data are reasonable.</i>	

Consistency Checks	Comments
☒ Defects removed are consistent with compile and test phase time and program size.	
☒ Total compile defect fix times are less than compile time.	
☒ Total test defect fix times are less than test time.	
☐ Defect dates & phases are consistent with the time log.	
☐ Planning summary is consistent with the time log.	
☐ Planning summary is consistent with the defect log.	
☒ <i>Planning Summary values are consistent with the size estimating template values.</i>	
☒ <i>Actual Added on planning summary close to and no less than actual BA+PA on size estimating template.</i>	

General	Comments
☒ Followed the defined process.	
☒ Complete, consistent and accurate process data collected.	
☒ The student did his or her own work.	
☒ <i>Historical data are used in planning the work.</i>
